CAREER OBJECTIVE

Independent and disciplined web developer specializing in frontend and MERN stack development. Passionate about building high-quality, user-centric digital solutions. Seeking remote opportunities that offer flexibility, foster innovation, and allow me to contribute.

SKILLS

Expertise	HTML, CSS, Tailwind CSS, JavaScript (ES6), React, Firebase
Comfortable With	Material UI, Express JS, MongoDB, Next.js, JWT
Tools & Platforms	Figma, Visual Studio Code, GitHub, Vercel, Netlify
Soft Skills	Time Management, Adaptability, Communication

PROJECTS

Virtual Book House *(June 2025 - June 2025)*   Live | Client | Server

A virtual library web app offering a smooth reading and purchasing experience for book enthusiasts. Faced challenges with React state management, responsive design, and integrating external APIs, which were overcome through debugging and continuous learning.

- **User-Centric Design**: Built with a clean and intuitive UI, enabling users to explore books by genre, author, or keyword with minimal friction.
- **Search & Filter**: Integrated search functionality and filters for genre, author, and book title to enhance the user's discovery experience.
- **Responsive & Accessible**: Optimized for both desktop and mobile devices to ensure accessibility across screen sizes.

Healthy Food Recipe Book *(May 2025 - May 2025)*   Live | Client | Server

A recipe web application promoting healthy eating by offering a collection of nutritious and easy-to-cook recipes. Faced challenges with API data handling, responsive layouts, and UI consistency, which were solved through experimentation, documentation, and hands-on learning.

- **Recipe Browsing**: Users can explore a wide variety of healthy recipes categorized by meal type, ingredients, and dietary preferences.
- **Search & Filter**: Includes powerful search and filtering options based on ingredients, cooking time, and meal category (e.g., breakfast, lunch, dinner).
- **Dashboard & Detailed Recipe**: View: Each recipe page provides ingredients, step-by-step instructions, and nutritional information and dashboard for showing all recipes in table.

Booster App Store *(April 2025 - April 2025)*   Live | Client

A modern web platform designed to showcase and promote mobile and web applications with sleek presentation and interactive UI. Faced challenges with layout responsiveness, dynamic content rendering, and UI/UX consistency and practice with Tailwind and React patterns.

- **App Showcase**: Features a curated list of apps with detailed pages including app descriptions, categories, ratings, and call-to-action buttons.
- **Interactive UI**: Built with modern UI components for an engaging user experience.
